GEORGE DOBLER KILLED IN MOTOR ACCIDENT

A very serious accident occurred seven miles south of Carbon on the Pole line on Tuesday morning about 9:30, when George Dobler was killed when his car turned over about 200 yards from Adam Bertsch's corner. Dobler was driving his own car, a chevrolet, and had with him a companion, R. Zernn, and they were driving along the pole line at a pretty fair speed, so it is alleged, when the car struck a rough spot and when the driver jammed on his brakes the car skidded and turned over a couple of times. Dobler, the driver, was found with his neck broken and it is believed that he was instantly killed. His companion, R. Zernn, escaped without injury. The Drumheller Provincial Police and Dr. McFarlane were notified immediately and they were at the scene of the accident in short order. On arrival, Dr. McFarlane pronounced life extinct.

George Dobler was a Russian German and was 23 years of age. He has two brothers in the Carbon district, both farmers. The deceased worked at the farm of Neill Cunningham this summer and fall and about three weeks ago bought the car which resulted in his death.

FREE SHIPMENT OF FEED WILL BE MADE TO CARBON

It has been announced that this year feed may be shipped in from outside points free of charge to the farmers. The arrangement has been made so that the farmers and stock owners will have the benefit of this free transportation, the cost being met on a fifty-fifty basis by the railways and the provincial government. To take advantage of the tariff every shipment must be certified by the deputy minister of agriculture as intended for feeding cattle, sheep and horses.

The arrangement is to stay in force until April 30, unless cancelled in the meantime as no longer necessary.

This includes the shipping in of baled hay or straw, threshed feed oats and grain screenings, all in carload lots.

LITTLE ITEMS OF LOCAL INTEREST

S. F. Torrance is around again after being confined to his home with a cold.

H. A. Hodding of Victoria, B.C., is visiting in Carbon.

Mr. and Mrs. A. Hay went to Brooks on Sunday and are visiting with their son and daughter-in-law, Mr. and Mrs. Clayton Hay.

The W.M.S. will hold a tea and sale of home cooking in the Farmers Exchange hall on Saturday afternoon, September 28th.

Mrs. J.A. Barr, who has been spending some time visiting here with her son, B.C. Barr, left on Tuesday for Denver, Col., where she will visit with relatives prior to her return to her home in Brantford, Ontario.

Born, to Mr. and Mrs. E. E. Ramsey, on Friday, September 20th, a son.

Miss Ellen Wiertz of Innisfail, arrived last Thursday and is visiting with her parents here.

J. J. Greenan was a Calgary visitor last week.

S. F. Torrance was a business visitor to Drumheller on Monday.

Mr. DeForest of Drumheller was a business visitor to Carbon on Tuesday.

The Misses Helen Smith, and Vera Poxon, and Wilfred Poxon and Jim Smith, were visitors to Calgary on Sunday.

The Women's Institute of Hesketh are holding a dance in the Hesketh Community hall on Friday, September 27th. Good music. Everybody welcome. Admission: Gents \$1.50; Extra! Lady 50c. Lunch included.

Street Car Conductor:— Madam, this transfer has expired. Late Lady Passenger—Well you can't expect much with the cars so poorly ventilated. I nearly expired myself.

CARBON TRADING CO.

PRESIDENT E. W. BEATTY AND DIRECTORS OF C. P. R. VISIT CARBON ON TUESDAY

Mr. E.W. Beatty, President of the Canadian Pacific Railway, and party were visitors to Carbon on Tuesday of this week and for the first time saw our little village. Mr. Beatty was met at the Depot by Mayor J. A. Macdonald and others.

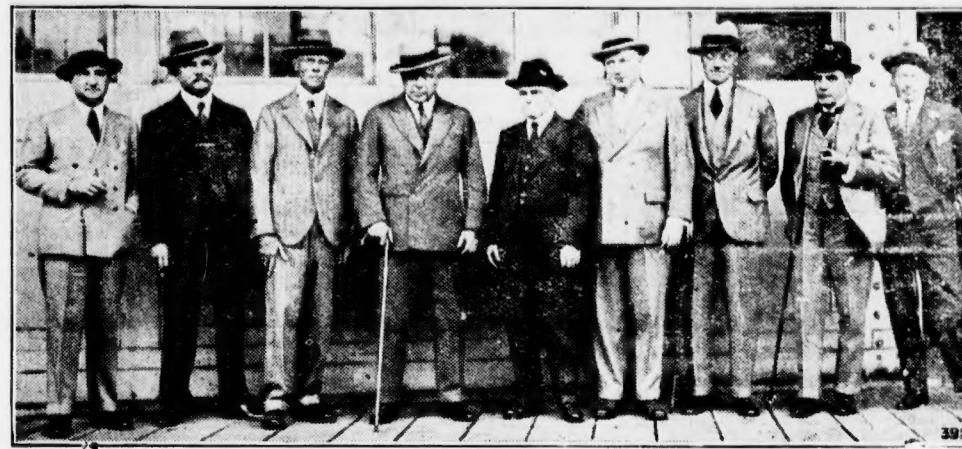

The special train left Calgary at 8:30

inspected the pure bred stock at the experimental station.

This was Mr. Beatty's first trip through this way and he was greatly impressed with the valley as a whole and is highly optimistic of its future.

This party of the president and

return. President Beatty and directors of the railway are here shown on their arrival at the North Toronto Station. From left to right, the photograph shows Rt. Hon. Lord Shaughnessy, W. A. Black, Sir George Garneau, of the Civil Service Commission, E. W. Beatty, chairman and president of the sys-

in the morning and made three stops between there and Drumheller, these being at Langdon, Irricana and Carbon. Mr. Beatty and party went through to Drumheller and then took the new line to Rosemary, Bassano and finally to Strathmore where the party

were on a tour of inspection of hotels, resorts, experimental farms and properties of the Canadian Pacific Railway, and great mineral, industrial plants and agricultural conditions on the route of their journey across Canada from Montreal to Victoria and

Dr. H. A. Beatty, chief surgeon for the C.P.R. Ontario district, Sir Charles Gordon, Ross H. McMaster, F. E. Meredith and Dr. Charles F. Martin, dean of the faculty of medicine, McGill University.

BOARD OF TRADE MEETS MONDAY

The regular meeting of the Carbon Board of Trade was held in the Municipal office on Monday night and a fair representative of the members was present.

P. Edwards reported that Mr. Bye of Trochu had intimated that if a flour mill were to be established in Carbon that the Village would have to finance the proposition as they were not prepared to put any money into the position.

Regarding the Field Crops competition in the Carbon district, Mr. R. S. Shaw reported that owing to the poor condition of the crops in the Carbon district this year, this competition was not held.

There was a discussion regarding the erection of a sign board pointing to Carbon and this was to be placed at the corner at Adam Bertsch's, 7 miles from Carbon. It was pointed out that as this sign board could be used to mark the distance through Carbon to Three Hill and Trochu, that possibly the Boards of Trade of these towns would contribute to the erection of such a sign and the secretary was instructed to get in touch with these Boards of Trade and find out what they would do in his matter.

A letter from the Alberta Motor Association was received requesting information regarding the road and location of the dinosaur bones which have been found north east of Carbon and the secretary was instructed to forward the necessary information.

A letter from W.H.T. Olive was received suggesting that the Carbon Board of Trade unite with the Calgary Board of Trade in its endeavor to prohibit wholesalers from retailing goods and the letter was placed in the hands of the merchants section of the Carbon Board of Trade to deal with as they see fit.

A suggestion was made that the U.F.A. local and the Board of Trade put on a joint banquet and get in a speaker and a committee of Messrs. Greenan and Fairbairn was appointed to interview the U.F.A. regarding this matter.

A resolution was passed that the Board of Trade recommend that the Village council arrange that the skating rink be operated in Carbon. D.G. Code and W.A. Braisher were appointed delegates to interview the council in this matter.

tem, Dr. H. A. Beatty, chief surgeon for the C.P.R. Ontario district, Sir Charles Gordon, Ross H. McMaster, F. E. Meredith and Dr. Charles F. Martin, dean of the faculty of medicine, McGill University.

The annual meeting of the Carbon

Curling Club was held in the Municipal office on Monday night of this week, immediately following the Board

of Trade meeting. The following officers were elected for the coming year:

President, G. W. Malton
Vice-President, S. F. Torrance
Sec.-Treas., R. J. Fairbairn

Executive Committee, L. Poxon, J.J. Greenan, A.F. McKibbin, F. J. Pessant and A. H. Jealous.

Chaplain, Rev. Wm. McNichol.

The treasurers report was read and adopted, this report showing that there is a deficit of \$87.20 from last year's operations, with outstanding membership fees of \$15.

Prospective and active members were discussed and membership committee composed of A.F. McKibbin and A. H. Jealous was appointed to canvas and see how many curlers would be available this year.

The question of annual dues came up for discussion and it was decided that if sixty curlers could be had this year the membership fees could be reduced to \$10 this year.

The matter of the levelling off of the curling and skating rinks was discussed and a committee of two, D.G. Code and A.H. Jealous, was appointed to go into this and find out the cost, etc., and report at the next meeting of the Curling Club which will be held on Monday, October 7th.

CARBON GOLFERS VISIT WAYNE CLUB ON SUNDAY

Last Sunday afternoon a number of the members of the Carbon Golf Club motored to Wayne to have a friendly match with the members of that club and a very enjoyable day was spent.

The scores were close in most cases although no actual record was kept.

The players from Carbon visiting Wayne were Messrs. J.J. Greenan, S. Carney, G. Peters, E.J. Rouleau, A.F. McKibbin, F.J. Bessant and R. J. Fairbairn.

Mr. and Mrs. H. Brown and Mrs. G. Peters were also visitors to Wayne that day, but did not participate in the play.

Removal Of Friction and Strife

The setting up of the organization of the League of Nations had, as its main object, the removal of those racial, religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and ever on the verge of war. Because of the bitterness and suspicions thus kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions to international intercourse were established.

Not only were national boundaries marked by lines of fortifications, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warned against the possible enmity of other countries, suspicions were never allowed to die down, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind, and nearly destroyed civilization. The statesmen of the world realized that unless something was done to remove these suspicions and causes of friction, it would be only a matter of time until another and still more colossal struggle would take place.

When it became operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for warlike purposes ended, the real causes of war must be removed, suspicions lulled, and a true understanding developed among all people. In other words, that a proper spirit of international goodwill must replace the existing narrow and blatant nationalism rampant everywhere.

The League, therefore, set up the International Labor Office, with the object of improving the lot of workers in all countries, and to raise the standard of living of the masses of the people everywhere, realizing that, if people are contented and happy, and living under a fairly high standard, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their own condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and it is persistently seeking improvement in all departments of the world's work and methods of living.

It is because of many really great achievements in these directions, coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world peace is to be found in the realm of economics, in the rivalries of nations in the field of trade and commerce. This is the age of big business, the age of mechanics, mass production, and of endeavour to sell the surplus products of one nation in the markets of other nations. While this has been more or less true of all ages, and wars have been waged in order to seize territory with a view to later commercial exploitation or development, the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

Premier Brand's proposal for a United States of Europe is economic, rather than political. We venture to say it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over Europe, isolating one nation from another, and doing economic hurt to all of them.

So, too, the Franco-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a larger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States, which live side by side in such mutual understanding and goodwill, are more frequently disturbed over tariffs than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely much of the present friction can be removed, and the world begin to trace the path that leads to the ultimately desired goal.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the Change of Life. It helps me and I cannot praise it too highly. I was troubled with heat flashes and my limbs were heavy so I could hardly walk to do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought

to give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to use my letter if you choose."—Mrs. D. B. PETERS, Wilton, Ontario.

Accelerated Schedules Feature C.P.R. Fall, Winter Time Table

New Schedules To Be In Effect Sunday, September 29th

The fall and winter time table of the Canadian Pacific Railway which will go into effect over the system on the last Sunday of September, features many important changes in passenger train service, among which is the speeding up of transcontinental trains, saving the coast traveller a matter of ten hours. These improved schedules are in line with the Company's policy of keeping abreast of the times and providing the best possible service to its patrons. The Company's ticket agents are now in possession of complete information, which is available to the public upon application.

A census is to be taken in more than 200 countries and colonies next year.

Postal Revenue**Now On a Level With What It Was Three Years Ago When Letter Rate Was 3 Cents**

Postal revenue is now on a level with what it was three years ago despite the return to the 2 cent letter rate (in Canada, the United States and Mexico) in 1926, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31st, 1926, the revenue was \$31,025,000, and for the fiscal year ended March last, \$31,170,000.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF**By Enriching Their Blood With Dr. Williams' Pink Pills**

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but do not reach the cause and the pains are soon back again. To get rid of this most painful trouble you must treat it through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills, which from first does to last actually make new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower East Pubnico, N.S., tells what these pills did for him. He says: "I had an attack of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would feel faint. I could not do the least work, and any movement caused great pain. I was under the care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt they were helping me. I took altogether about a dozen boxes when I was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Greatest Wheat Exporters**Canada Stands At Top Of the List As Exporter Of Wheat**

Canada stood first as an exporter of wheat during the 1927-28 crop year, with exports of 255,062,278 bushels. The United States came second with exports of 168,307,000; Argentina, third, with 155,258,000 and Australia fourth, with 80,980,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 479,665,000 bushels ranking third with Russia in the first place and the United States in the second.

When Asthma Comes do not despair. Turn at once to the help effective Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Bananas are banned in Italy because they do not grow in that country or in any of its colonies. This is protection carried out to the limit.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Apples imported into England from Australia must in the future measure not less than two and one-quarter inches in diameter.

Tired Feet

Bathe with Minard's in warm water, rubbing into aching parts. Soothing and relieving.

**Daring Stunt Flyers****"Four Musketeers Of the Air" Defy Death At Camp Borden**

"Four Musketeers of the Air" is the title accorded a small group of Canadian aviators who are rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best, at its own particular game.

The Musketeers are Squadron Leader C. McEwen, M.C., Flight Lieutenant David A. Harding, famous rugby player, Pilot Officer E. McNab and Pilot Officer E. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Siskin pursuit planes.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics. At Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performances were regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunting at the finishing part of a novice flyer's education. It is a means of obtaining perfection in the control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed.

One of the Musketeers' favorite stunts is a very spectacular one. The planes, starting in formation at around 3,000 feet, suddenly nose down. At terrific speed, with motors wide open, they spread out, fan-shaped, and suddenly zoom up. At the peak of the climb, with the motors nearly stopped, the planes gradually fall over backwards and fly for some distance upside-down.

Stop Colds with Minard's Liniment.

Visitors to the home of Charles Darwin, in Kent, England, may now see the chair and writing board at which Darwin worked while writing his famous theory of evolution.

Sheep Ranching Expanding**Industry Is Showing Promising Development In British Columbia**

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, states the Department of Agriculture. Last fall upwards of 10,000 head of ewe stock were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

THOMAS PLEASED WITH HIS RECENT VISIT TO CANADA

Liverpool, Eng.—"I am completely satisfied with the results of my visit," declared Right Hon. J. H. Thomas, Lord Privy Seal and Minister of Employment, on his return from a visit to Canada. "I hope and I feel that it will contribute towards a solution of the unemployment problem of this country this winter."

"I promise to meet representatives of all business interests which can do business with Canada, so the necessary steps can be taken to give practical effect to my efforts. Canada will take coal and steel from Great Britain which she at present takes from other areas."

"I have not asked Canada to take from us things she produces herself, but I did ask something on account of Britain being the largest buyers of wheat from the Dominion," Mr. Thomas went on. "Canada," he declared, "admitted the force of what he put forward.

"Although, as I say, I shall meet the business organizations of the old country, I say once again, as I did when I took office—there can be no infallible unemployment remedy produced artificially. What we want for that are customers, and these I have done my best to secure," Mr. Thomas added.

Entertained By Royalty

Premier MacDonald and Daughter, Ishbel Guests At Sandringham Castle

Sandringham, Eng.—King George and Ramsay MacDonald sat together in the drawing-room of Sandringham Castle tonight and talked about whatever it is that a monarch and premier discuss when the latter is on the eve of a historic journey to the United States.

The Prince of Wales looked in for a short time before leaving the castle. The premier and his daughter Ishbel were house guests tonight of Their Majesties and will probably motor back to London tomorrow.

Mr. MacDonald also had a long interview with the King this afternoon while Miss Ishbel was talking with Queen Mary.

Damage To Chinese Property Enormous

Government Estimates Cost Of Russian Raids At \$25,000,000

Shanghai.—The Chinese Nationalist Government estimated damage to Chinese property from Russian raids of Manchurian border points at \$25,000,000, according to a Kuomin semi-official agency despatch.

For three months the 2,000-mile Russo-Chinese border between Manchuria and Siberia has been the scene of sporadic fighting, the trouble starting over Chinese seizure of the Chinese Eastern Railway administration from the authority of the U.S.S.R.

Income Tax Collections

Ottawa.—Income tax collections are mounting. In the five months ending August 31, collections totalled \$60,392,142, an increase of \$9,311,918 over the same period in 1928. In August alone, according to the National Revenue Department's figures, collections were \$850,427, as against \$822,100 in August of last year.

Earthquake Recorded

Saskatoon, Sask.—The seismograph at the University of Saskatchewan, here, recorded a severe earthquake shock Sept. 17th. It was the most severe registered here in many months. The location of the earthquake could not be determined until compared with records from other points.

Army and Navy Veterans

Quebec.—The annual convention of the Army and Navy Veterans' Association opened here with more than one hundred delegates from various parts of Canada in attendance. Brig.-Gen. Hon. W. A. Griesbach, of Edmonton, Alta., presided.

For Compulsory Pool

Aaron Sapiro In Favor Of Marketing System Without Limitation

Estevan, Sask.—"I am for co-operative marketing without reservation and without limitation, but above all I am for control of the commodity that the farmers raise by the farmers who raise it, and I am for the absolute elimination of even part of that control by those who have a financial interest in breaking down your great pools. I am for co-operation as a means to an end, that your own wheat by the farmers who end being the absolute control of raise it in whatever technical method they think is the best method of control."

Before 700 farmers of the districts tributary to the town of Estevan, Aaron Sapiro, America's most famous co-operative farming advocate, gave expression to these sentiments when, under the auspices of the local lodge of the Saskatchewan section of the United Farmers of Canada, he opened the first gun in the campaign now being started in favor of a sentiment of one hundred per cent. pool by legislation.

Without equivocation of any kind, Mr. Sapiro announced himself as being wholly in favor of one hundred per cent. pool by way of legislation, and in the course of an hour's address gave reasons why such legislation should be sought, why the farmers of the province should market all their grain through a single control, and why those who are now outside the pool should be compelled by way of legislation to place their products through the single marketing organization.

Four questions were outlined by Mr. Sapiro as the basis of his address: first, do the farmers generally understand what is meant by the term "one hundred per cent. pool"; second, why was he brought to the province to advocate the method; third, what objections are raised to it; fourth, why are the reasons for legislation greater than those against it.

H.B. Line Now Ready

But Regular Trains Will Not Be In Operation Until Next Spring

The Pas, Man.—The Hudson Bay Railway is now in shape to allow regular trains to be run to Churchill with safety, it was learned here in official railway quarters.

The final two miles of ballasting of the "First Lift" were completed this week, placing the road in condition for regular traffic.

However, passenger trains will not be run to the Bay until the spring, according to a recent decision in Ottawa. Railway quarters deny the report published in the local press that the muskeg train had completed its first run to Churchill. The train completed its run at Mile 412 as usual. When the train left here recently, it included the private cars of Major J. G. MacLachlan, district engineer, and D. R. Campbell, general superintendent of construction, western region. However, the business cars were taken from Mile 412 to the Bay on a work train. The two officials made an inspection of the Flin Flon and reported everything in order.

Marler Presents Credentials

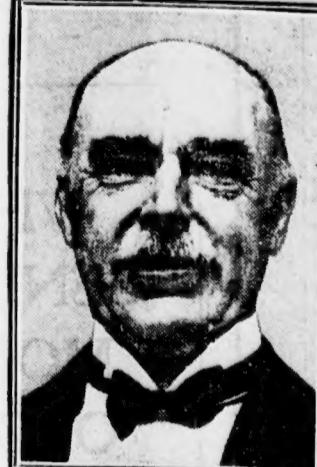

New Canadian Minister To Japan Received By Emperor

Tokio.—Hon. H. M. Marler, new Canadian minister to Japan, presented his credentials to the Emperor Hirohito. Mr. Marler rode in an automobile of the Imperial household from his hotel to the palace. The ceremony was brief. The foreign minister and minister of the household were present. Japanese Minister Tokugawa also was given farewell audience by the Emperor, prior to his sailing for Canada on the "Empress of France."

Mongolians Mobilize

Tokio.—Japanese press agency reports state that the outer Mongolian Government is said to have mobilized all men between the ages of 20 and 40, and has ordered two cavalry divisions commanded by Soviet officers to move to the frontier. The report adds that preparations have been made to move 50,000 troops in accordance with developments in the Russo-Chinese situation in Manchuria.

PROMINENT FINANCER

Sir Robert Bothby, prominent financier of London, England, who is making a tour of the Dominion with Alfred Shepherd, another British capitalist, with a view to looking over the various industrial and financial institutions here.

Making Trip To West

Premier King To Make Short Visit In October

Ottawa.—Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west. Definite arrangements for the trip have been somewhat held up owing to lack of information as to just when Premier Ramsay MacDonald was coming to Ottawa. It has now been settled that Mr. MacDonald will be in the capital shortly after the fifteenth of October, and Mr. King's trip will begin after the departure of the British prime minister.

Employment On Increase

Ottawa.—Employment in Canada at the beginning of August showed a further marked increase, according to statements tabulated by the Dominion Bureau of Statistics from 6,840 firms whose payrolls aggregated 1,097,812 persons as compared with 1,070,817 persons on July 1st. The record is unusually good for this time of the year and the index number at 127.8 is a record for all time.

Canada Will Sign

Ottawa.—Canada will certainly sign the optional clause in the statutes of the world court of international justice, Premier Mackenzie King says. Mr. King was asked in regard to discussions which are going on at present in Geneva with respect to the signing of the clause by members of the British Empire.

Young Aristocrats Sail

Standing on each side of Captain J. N. Griffiths, skipper of Canadian Pacific steamship "Montclare," the Hon. John and the Hon. George Rodney, aged 9 and 10 respectively, had just made the 2,000-mile trip from their father's ranch at Fort Saskatchewan, Alberta, unaccompanied across Canada under the care of Canadian Pacific Railway officials. They are on their way to school in England. The elder is eventually destined for Eton, and the younger will enter the navy via training ship at Dartmouth. Their father is the descendant of the famous British Admiral who won the great sea fight at Cape St. Vincent in 1780.

Guiding 'Planes By Remote Radio Control

Aero Club Given Glimpse Into Future Of Air Transportation

Philadelphia.—Aeroplane speed of 416 miles an hour and "planes navigated without a pilot aboard through the medium of remote control by radio were glimpses into the future given to members of the Aero Club of Pennsylvania, and the Rotary Club, by speakers at a joint meeting here. It was G. E. Toews, chief engineer of the Aeronautical Laboratories at the navy yard, who in a technical address discussed speed possibilities. A speed of 416 miles an hour is the maximum which can be delivered by any known present day machine, he said, "although Britain may have an engine up her sleeve" larger than any yet constructed.

Edward P. Howard, chief of the air regulations division of the United States Department of Commerce, disclosed that an application has recently been made for the licensing of a pilotless machine to be navigated by radio impulses.

Police Return Young Doukhobors To Home

Children Made Escape From Institution At Vancouver

Vancouver.—Eight Doukhobor children, seven girls and a boy ranging in age from eight to 16 years, escaped from the children's aid home here, and set out to join their parents at Oakalia jail. In response to an alarm from the matron of the institution police located the youngsters and returned them to the home.

The children were brought here at the same time that more than 100 members of the Sons of Freedom, a sect of Doukhobors, were brought to jail here to serve six months sentences for taking part in a nude parade at South Slocan, B.C.

Imperial Trade Conference

Movement Under Way To Formulate An Empire Trade Policy

London, Eng.—It is understood that attempts are being made to organize an Imperial commercial conference to be held prior to the meeting of premiers of the British Empire at the Imperial Conference in 1930.

It is proposed that each Dominion shall appoint a small delegation representative of the various interests, agriculture as well as business. The delegation will meet in London three months before the premiers and endeavor to hammer out an Empire trade policy which if agreed upon will be submitted to the premiers as a guide in their deliberations.

FOR CONTROL AND LIMITATION OF THE DRUG EVIL

Geneva.—The British delegation at the League of Nations assembly has presented a proposal designed to bring out an international agreement for control and limitation of production of heroin, morphine and cocaine. The move was regarded as representing a complete reversal by the Labor Government of the late Baldwin Government's attitude in refusing to enter an agreement seeking to limit manufacture of narcotics.

The new British position was announced to the assembly's committee on social questions by N. Baker, member of parliament. The British recommendation is that the League Council invite the governments of countries in which narcotics are manufactured to confer together as to the possibility of reaching an agreement on the total amount of each of the various forms to be manufactured annually and as to the quota of each that these countries should manufacture. The new attitude adopted by Great Britain brings her into accord with the attitude of Canada, the United States and Italy.

By the British resolution initiative in calling a conference of the States is placed in the League's Council.

British Premier May Call Power Conference

Report Says Invitations Likely To Be Issued Shortly

Washington.—Invitations to the five-power naval conference proposed to be held late in January will be issued by Premier Ramsay MacDonald in the near future, but the exact time remains to be determined.

This was learned here authoritatively recently, and with it came the further information that there would be no joint invitations on behalf of Great Britain and the United States as has been suggested in some quarters. Secretary of State Henry L. Stimson, said published despatches emanating from London, that Premier Ramsay MacDonald already had sent invitations through the British embassies at Tokio, Paris and Rome, were without authorization and entirely inaccurate.

The invitations from the British government will go to the United States, Japan, France and Italy, with all five expected to participate in the conference which it is now proposed shall be held in the British capital.

Considerable preparatory work must be done before the invitations are sent forward through the British embassies. It may be that action would be deferred until after Premier MacDonald has held his conferences with President Hoover, in Washington, early in October, on points still in controversy between the United States and Great Britain on the cruiser question.

Will Represent Japan

Tokio.—Japan's first step in the new movement for naval disarmament was announced recently, when the navy ministry ordered Commander Tamon Yamaguchi, of the naval general staff, to proceed to Washington, to join the Japanese embassy staff there, preparatory to the proposed conference for naval limitation.

To Confer With Hon. Forke

Ottawa.—Hon. George Hoadley, Minister of Agriculture from Alberta, is in the capital for a conference with Hon. Robert Forke, Dominion Minister of Immigration. While the subject up for discussion was not officially made known, it is understood certain phases of the employment situation in Alberta are to be discussed.

Leads Opera In Germany

Berlin.—Albert Coates, noted conductor, led Boris Godounov, at the State Opera, as the first Englishman to wield the baton at the Berlin Opera since Sullivan conducted the Mikado many years ago. Mr. Coates was warmly received by the German audience.

EDOUARD J. ROULEAU,
Editor and Publisher

The Village Council have recently constituted a bylaw which says that no buildings will be allowed to be erected in the Village of Carbon under the value of \$1200. This by-law should be published so that the ratepayers may know just what is required of them in case it is their intention to build sometime. It seems that it has always been the custom in the past by the Village Council to pass by-laws and give other notices out, but that they were not to be published in the local paper and thus 75 per cent of the tax payers never knew of what was being done or expected of them. This by-law and all future notices should be published in the local paper for the benefit of the tax payers, who will gladly bear the little expense incurred if they can look over these new acts without going to the secretary's office to do so.

SPARE THE CHICKEN

(The Hanna Herald)

With the opening of the season for shooting bird game, one is reminded of the ill-advised opening of the season for prairie chicken, north of the Red Deer River. Chicken, once so plentiful throughout the prairie provinces, have dwindled until sportsmen united in their efforts to save the few remaining flocks. Representations were made to the provincial government, asking that closed season be declared for an indefinite period, and this conservation measure has been the means of giving the chicken a breathing spell. Today, prairie chicken are said to be on the increase.

The northern section of the province is fairly well supplied with chicken, but as one goes south their numbers grow fewer, and this finest of all prairie birds is practically gone from this section. The opening of the season, north of the Red Deer, will mean the depletion of the few remaining coveys unless sportsmen are true sportsmen in the word's most literal sense.

Local sportsmen are reminded that an open season should never have been declared in these parts. The number of chicken in this country never justified an open season. But since this part of the province is included in the "open" area, the sportsman is asked to pass up the chicken.

Game associations and all, no matter what resolutions be passed, will never accomplish much in the protection of game life unless the individual plays the game.

This year, keep four fingers off the trigger when you see a prairie chick-

en. Try Hungarians instead. They are plentiful and offer a better test of your marksmanship.

BUY AT HOME

A community thrives when its merchants thrive.

Home town buying and trading is as essential to a community's growth and progress as its streets, boulevards, churches and schools. It is the duty of every citizen of a community to make his purchases at home. Numerous "Buy At Home" campaigns have stressed this fact and have taught this important lesson; but still there are some people who go elsewhere than their own home surroundings when making purchases.

The truth is that as good merchandise can be obtained at home as can be secured through the mails from any large city; and, as patronage increases, the quality of the local merchant's stock is bound to grow even greater.

There are numerous reasons why you should patronize your home merchants. They have invested their money and their future in your town, they pay taxes in your town, they give employment to people in your town.

The wide-awake citizen should boost his town in every way. He should take a lively interest in local activities of every nature, join the local clubs, attend the local performances. No need to go elsewhere; all the real pleasures of life are available right at your door step.

And to put in a good word for ourselves, it is a mighty good idea to be a regular reader of your local paper!

Running a newspaper is just like running a hotel—only different. When a man goes into a hotel and finds something on the table that does not suit him, he does not get up and tell the manager to stop his darned old hotel. Well hardly. He sets that dish on one side and wades into some of the many dishes that do suit him. It is different with some newspaper readers. They occasionally find an article that does not exactly suit them and without stopping to think it may please hundreds of other readers, make a grandstand play of their supreme asinity and stop their paper.—Ex.

1930 CHEVROLET OUT

The new Chevrolet six-cylinder models have just been announced by the Chevrolet Motor Company of Canada. Their introduction has come at a time when Chevrolet is enjoying sales far ahead of those ever recorded by a manufacturer of six-cylinder cars; for figures just issued reveal that more than one million Chevrolets have been produced so far this year.

Chevrolet's two new models are the sport coupe and the Imperial Sedan. The former is a smart four passenger car complete in every detail yet moderately priced. The top and rear-quarters of this model are solid, a roomy folding seat in the rear deck accommodates two passengers, and the window may be lowered to make driving more enjoyable for the whole party. The Fisher body is streamlined and finished in duco colors.

The Imperial Sedan is also built with solid top and rear quarters. Landau irons, plated with sparkling chrome, give a touch of distinction to the car. A long, sweeping hood, bullet type head lamps, chrome plated radiator and one piece full crown fenders, as found on all Chevrolet models, add further to the appearance.

The Fisher body has concave front pillars with rakishly moulded visor. The standard colors are black with moulding in saginaw green and striping in tusk ivory.

In these as in other Chevrolet models is found the 46 h.p. six cylinder Chevrolet motor, with its fuel pump, air cleaner, improved combustion chamber and other features.

Diamonds From Sugar

Scientist Produces Sparkler That Was Made In Laboratory

Predictions that large and beautiful real diamonds can be made by man, was made to the American Chemical Society, at Minneapolis, by Professor J. Willard Hershey, of McPherson College, McPherson, Kansas.

He laid on a glass slide a tiny crystal, the size of a grain of sand. He said it was a real diamond, produced in his laboratory at McPherson. It was made from ordinary pure table sugar subjected to pressure estimated at ten tons to the square inch.

WHEN BABY IS WELL MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing, gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Kech, Lindberg, Alta., is one of these mothers and she writes as follows:—

"I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels; sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

French Bakers Celebrate

Commemorated Four Hundredth Birthday Of The Doughnut

This generation has an evident fondness for anniversaries. People like them, and seek causes for holding them. Therefore, no person can object when French bakers decide to commemorate the 400th birthday of the doughnut.

The first example of the famous comestible was made in Paris in 1529. Some time later it got passage over the Channel into England, and from there made its way with household effects and other ideas to this continent.

The first doughnut, we read in the Christian Science Monitor, was shaped like a crescent. That is, of course, interesting, but is of comparatively little importance. The real thrill will come with the name of the genius who first took a hook and molded the doughnut round the vacant space.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognized in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Research Possibilities

By Dr. H. M. Tory, President National Research Council

No one can realize what may be before us. I saw a statement made by a distinguished professor of chemistry that if we could write down the formulae for all combinations possible from a molecule containing one hundred atoms, these formulae alone would fill all the pages of all the books in the world. He was giving that as an illustration of the wide open field that lies before the chemists of this country in developing its chemical industry. Fifty years ago, there was no such thing as a strictly chemical industry. Last year in Canada alone there were invested in chemical and allied industries \$750,000,000 which produced \$500,000,000 worth of products, while in the United States the corresponding production amounted to approximately \$7,000,000,000.

Women In Airplane Factories

Are More Adept At Finer Adjustments Than Men

Much of the most exacting work in the construction of an airplane is done by women workers. Builders have found that women are most adept at shaping and sewing the fabric covers of wings and making certain delicate adjustments on the wings and struts of airplanes. Also, they are often called upon to plan the decorations of the interiors of planes built on special orders.

Major Reuben H. Fleet, president of Fleet Aircraft, Inc., of Buffalo, has many women workers in his plant. "We find that women can do the complicated work of covering the wings and assembling ribs and fitting them more accurately and in less time than men," he said.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canobie, N.B., writes:—"My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved.

"I have used it for the other children, and my husband and myself. My husband gives it great praise, and when he goes away from home to work he always takes a bottle with him."

SUNDAY SCHOOL LESSON

SEPTEMBER 29

SIGNIFICANCE OF THE EXILE AND THE RESTORATION

Golden Text: "The lovingkindness of Jehovah is from everlasting to everlasting upon them that fear Him, and His righteousness unto children's children."—Psalm 103:17.

Before the destruction of Jerusalem, the prophet Ezekiel went into exile with the first deportation, and five years afterwards he was called to the prophetic office. It was a severe arraignment of the people of Israel that he was told to make in the name of the Lord. Ezekiel lived up to his responsibility. Do we live up to ours? It is one thing to have convictions, but quite another thing to have the courage of convictions. A responsibility calls for a response. Not to respond to the responsibility that rightly belongs to us is cowardly and base.

The captivity was God's training school where the exiles were given an opportunity to lament their rebelliousness and recognize their dependence upon Him. Jeremiah had prophesied that after seventy years were accomplished, God would visit and perform His good word toward them, in causing them to return to their home. The first opportunity for return from exile came in the first year of Cyrus, King of Persia. Jehovah stirred up the spirit of his king to make a proclamation permitting any who wished to go back and build the house of Jehovah.

The chief desire of the returning exiles was to rebuild the temple and re-establish their ancient worship. It was a great day when the foundation of the temple was laid, vocal and instrumental music formed part of the ceremony, and joy reigned supreme. But while there was joy in all hearts, conflicting emotions filled the hearts of the old men who had known the glorious temple of Solomon. They were weeping as well as rejoicing. Life has many such scenes, when the bitter mingles with the sweet. One of Tennyson's odes refers to a wedding as "the white funeral of single life." The foundation laying of that second temple in the midst of ruin and desolation was to the old men a "white funeral" of all the glories of the past.

Juveniles To Compete

Boys' and Girls' Swine Clubs Membership Is Necessary

More than five thousand boys and girls on Canadian farms will be taking part in the annual swine club and calf breeding contests in the various provinces this year, for which the Canadian National Railways offer prizes and trophies, it was stated recently by Dr. W. J. Black, Director of Colonization and Agriculture, of the National System. Through the stimulation of the assistance offered in this work by the railway company, in bringing the boys and girls together in annual competition, the work of the clubs has progressed rapidly, particularly with respect to calf clubs. There will be nearly 200 of these in operation this year, there being a 400 per cent. increase over last year.

Wheat Marketing On Protein Basis

Dr. Robert Newton, professor of field crops, of the University of Alberta, has been asked by the National Research Council, of Canada, to make investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of Parliament.

Minard's Liniment—Used for 50 years.

Huge Milk Shipment

Largest Consignment Of Its Kind Shipped From Aylmer To Western Canada

Seven hundred and fifty thousand cows working in high gear for one whole day could contribute just enough milk to make up a shipment which left Aylmer, Ont., on a special Canadian National Railways freight recently for the west. Product of an Aylmer Milk Evaporating Company, it was the largest shipment of its kind ever to leave any point in Canada, and made up a train consisting of 200 cars. There were 11,880 cases containing 700,000 cans and weighing 353 tons in the consignment which is destined to grace the tables of farm houses during coming season. It required 1,500,000 pounds of fresh milk to make up this shipment at the largest evaporated milk plant in Canada. The product has a value of \$65,000 and is pointed to as a sterling example of an extension of the dairying industry in Canada.

Although a small part of the shipment will reach the Pacific Coast, it is, in the biggest part, for consumption throughout the prairie provinces.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Married women in Dallas, Texas, are not permitted to hold positions outside their homes, unless there are "especially mitigating circumstances."

James Fenimore Cooper could not write unless he was chewing gum drops, it is said.

NEVER wait to see if a headache will "wear off." Why suffer when there's always Aspirin? The millions of men and women who use it in increasing quantities every year prove that it does relieve such pain. The medical profession pronounces it without effect on the heart, so use it as often as it can spare you any pain. Every druggist always has genuine Aspirin tablets for the prompt relief of a headache, colds, neuralgia, lumbago, etc. Familiarize yourself with the proven directions in every package.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, a singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. Grace, the cigarette girl at Blackie's, who loves Al without his knowing it, is left behind. He marries Molly Winton, a ballad singer, and makes her famous, too. She does not love him. Molly has a baby, Junior, whom Al adores. Al becomes part owner of the fashionable Club Bombo, and on the night of the third anniversary of his marriage presents his beloved Molly with a diamond brooch. He does not know that Molly, while approaching the club in her limousine, was ardently kissed by his friend, John Perry, who begged her to leave Al. On the way home with Al she is moody. When she sees Al later in the nursery bending devotedly over sleeping Junior, his baby son, her conscience bothers her. This, in turn, makes her angry at her husband.

CHAPTER XIV.

Al heard Molly's step and turned to embrace her. She deftly avoided his grasp, stifling the look of aversion in her eyes as she did so. Al thought nothing of it; he believed she was merely anxious to avoid any noise that might wake Junior. Again he made a move as if to touch the child, but Molly caught his hand.

"Shh!" she murmured in an irritated voice. "Don't wake him. I'm tired. He might cry."

Al pretended in earnest pantomime that he had no intention of waking Junior, but, unseen by Molly, his other hand crept toward the protruding toe of the boy. The truth was Al couldn't bear the thought of going to bed without a word or two with little Junior. So as Molly turned away to go to her own room Al nudged the baby's foot and smiled to himself. Junior's eyes opened sleepily and, as he recognized his father, he murmured, "Hello, daddy."

At the gentle words Molly turned, a smile stealing over her face in spite of herself. There stood Al, pretending surprise that Junior had awakened, but obviously delighted that it had happened. He quickly leaned over, gathered the baby in his arms and straightened up with the child held close to him. One chubby, soft arm went round his neck.

"Good boy, daddy," whispered Junior, snuggling closer. "Came home."

Swiftly Al carried his precious bundle toward Molly, who waited, a look of indiction upon her face. She wanted to see Junior and cuddle him, too, yet the sight of his innocent baby face at this moment

At this moment she glanced in the

mirror to see Al approaching from behind, his face aglow with that same expression of joy and devotion. As he came closer and slipped his arms around her she jumped up and stepped out of the embrace, making no attempt to hide her displeasure. Before Al could say anything in protest she had crossed the room.

He shook his head in astonishment. Oh, well, he thought philosophically, it was just another of Molly's moods. He made a move to cross over to her, but suddenly Molly's white arms went above her head in protest. She stood glaring at him, like an animal at bay.

"What's the matter with you, Molly?" he asked sharply, in amazement. "What have I done? For weeks you haven't seemed like yourself!"

There was challenge in Al's voice, but there was pleading, too. The expression of aversion left Molly's face; desperately she struggled to think of an explanation that would smooth things over. But it was no use—she had gone too far; there was no turning back.

"What is it, darling?" Al pleaded. "Can't you tell me? Haven't you everything to make you happy—a beautiful home—a baby—me?"

But Molly seemed to grow harder with every word he uttered. Her icy silence, as she confronted him with gleaming eyes, sent a dreadful current of fear through him. Was there nothing he could say to arouse her—to drive out this evil spirit and bring back the Molly he loved. He said with a controlled quietness that gave no hint of his madly throbbing heart:

"You act as though you didn't love me—any more. Don't you?"

At that Molly's head came up. It was as if she had been waiting, trying to force him to a show-down. Now she was ready to speak.

"I don't love you any more."

The dreadful words were spoken slowly and soberly, but the minute they were out a look of disdain curled her lips and her eyes flashed defiance. Now—at last—she had come clean. Now, her attitude said, what was he going to do about it?

Al recoiled as if she had struck him across the face with a whip. The words seemed to travel swiftly down interminable corridors in his brain, and come echoing back.

But finally Molly could stand the silence no longer.

"You heard me!" she exclaimed harshly. "I meant it. I don't love you! Do you understand? I don't love you! Now let me alone!"

The last remark was shot at him with deadly aim and purpose, as she might have thrown a burning, blinding faggot. It was all over now, she thought; there would be no more pretending on her part. This was the climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him now with a terrible intensity because he had made her feel unworthy by loving her too much. She wanted to hurt him with all the cruelty in her power, driving forever that adoring look from his eyes.

Al did not cringe as he listened to her, yet he knew at last that their life and comradeship together were utterly smashed. His face was pale as death. But as they faced each other, eyes agleam, hands clinched, they heard another sound like the faint sweet tinkle of a bell. It was Junior's voice, calling gently:

"Mamma. Please come to me."

(To Be Continued.)

Kill that corn with Minard's Liniment.

Car Accidents In Iceland

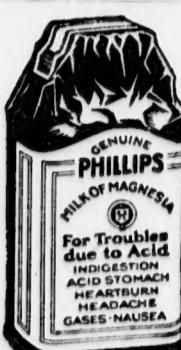

Increasing Number Of Automobile Accidents Presents a Problem

Iceland, of all places under the sun, is complaining of its growing number of automobile accidents.

Just like Chicago and New York and London, this metropolis has its careless drivers and its drunken drivers. And all of this, of course, makes for more accidents.

An auto bus took a turn in a country road too rapidly. Two passengers were killed and the others injured. Icelandic authorities haled the driver into court, found that he conducted his bus in a most careless manner and sentenced him to a month in jail. His license was taken away permanently.

Idea May Be Feasible

Berlin To New York In Six Hours Is Plan Of Young Engineer

"Take a solid breakfast in Berlin and don't worry about food on the plane. You can have lunch in New York!"

This might be the last advice given by good friends to a passenger of a futuristic airplane not yet constructed, but planned by Heinz-Guenther Perl, a 21-year-old Berlin engineer. Perl claims that his plane would make the trip from Berlin to

New York in about six hours, saying that world-famous scientists and experts like Professor Einstein and Count Arco studied his device carefully, approved of it and now firmly believe in its feasibility.

The Coming Era

The air age will have fully arrived when trans-oceanic flights are made without the accompaniment of big headlines in the papers.

Birds cannot see blue or violet, but they do see red and infra-red.

Packed full of fire for any sort of ignition job—farm engine, tractor, marine motor—Eveready Hot-Shots put the pep behind your cylinders!

Last longer because they recuperate marvellously. Protected by metal case against damp, rain or accident. Give full value for your money. Ask for Eveready Hot-Shots by name. If the label does not say "Eveready", it's not a genuine Hot-Shot.

WORLD'S FAMOUS THREE FUEL HART PARR

In special tests conducted by nationally known engineers who used cheap distillate fuel the great Hart Parr 18-36 registered a draw bar pull of 5,535 pounds at 2 miles per hour and 4,075 pounds at 3 miles per hour, on the belt it easily pulled the amazing load of 43 horse power. The Hart Parr is a three fuel tractor and will burn gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest low grade fuel. Hart Parris are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive yourself and experience the thrill of controlling tremendous power.

POPE LEASE WOMAN ALLEGED TO HAVE SOLD HUSBAND'S CROP

Friday, the thirteenth, was an unlucky day for Mrs. James Robbins, wife of a farmer in the Pope Lease district. Mr. Robbins, who is a returned soldier, recently went to the Belcher hospital, Calgary, for treatment of an old sharpnel wound, so his wife is alleged to have seized the opportunity and all the available cash for the purpose of taking a trip to the Land of Her Fathers in Wales.

Mrs. Robbins booked passage for England in Drumheller, and boarded the late train on Friday evening, (the 13th). The next morning a long distance call was received by Sgt. Skelton from Mr. Robbins, resulting in investigations being made, and the lady being intercepted at Winnipeg on Tuesday. Mrs. Robbins is now being brought back to Calgary by the A.P.P. to face charges of theft, and is expected to arrive in the city on Friday.

It is alleged that the accused sold about 1000 bushels of grain and other goods, and then, with her three-year old son, bought a ticket for England with the money. It is understood that Mr. Robbins is a Russian by birth. — The Drumheller Mail.

SATURDAY NIGHT DANCES PROVE POPULAR

The Saturday night dances being held in the Elks hall under the auspices of the Carbon Elks are proving quite popular and a good crowd has been present each night. The music has been provided by the new Brunswick Panatrophe.

NO BUILDINGS FOR CARBON TO COST UNDER \$1,200

At the regular meeting of the Village council, held on Monday of last week, a by-law was read which states that no buildings will be allowed to be erected in the Village of Carbon under the cost of \$1200. This by-law will not be put in effect on the island."

BIG DANCE BEING PLANNED FOR FRIDAY, OCTOBER 4TH

Friday, October 4th has been the date set by the Carbon Elks to hold their big dance in the new hall and every arrangement is being made to give the dancers something for their money. The floor is being put in shape for this dance and it should be in first class condition on this date. Music is being furnished by the Carbon Elks Orchestra and lunch is being served at midnight. As this is the first big dance of the season it is expected that everyone will turn out and make this affair a real success.

MUNICIPAL HAIL RATE 8 P.C.

It has been announced by the Secretary that the rate for the Municipal Hall insurance in the Municipal District of Carbon this year was eight (8) per cent. This is the lowest rate recorded for a number of years.

RALLEY DAY ON SUNDAY

Sunday, September 29th will be observed as rally day in the Carbon United Church and instead of the usual Sunday school in the morning, the Sunday school session will be dispensed with and a joint service will be held in the evening at 7.30. Everybody is welcome.

HOLLYWOOD STREETS ECHO TO MACHINE GUN FIRING

Hollywood's streets were in a turmoil for five days and the staccato rattle of machine guns blotted out the hum of traffic during the making of the Clara Bow starring picture, "Ladies of the Mob," which has been booked for the Carbon Theatre for Friday and Saturday of this week.

The picture is described as being a raw slice of the underworld, a dramatic vehicle of spectacular climaxes and thrilling action in which all of the resources of the great Paramount organization were concentrated during its making.

Motorized police of the Los Angeles department were drafted to duty during the making of "Ladies of the Mob," for much of the action was taken on the broad thoroughfares of the motion picture capital and there was always danger of accidents to bystanders.

The story of "Ladies of the Mob," "mob" in this case being the underworld parlance for gang, was written by Ernest Booth, well known as a writer of short stories. The adapta-

tion for the screen was the work of O.H.P. Garrett, former New York newspaper man and the continuity is from the pen of John Farrow.

William Wellman, who directed "Wings" and "The Legion of the Condemned" for paramount, directed the picture. Richard Arlen, featured in the "Wings" cast, plays the chief supporting role opposite Miss Bow.

NEWS OF ALBERTA

W. R. Hawkshaw, harness maker at Wayne, was found dead in his home last week.

The "talkies" have been installed in the Rex Theatre at Youngstown.

The Calgary Power company is proposing to purchase the public utilities of the City of Wetaskiwin and a vote of the burgesses will be taken on October 14th.

Turner Valley residents are building a new community hall.

Work has started on the new skating rink at Okotoks.

The three silent policemen which for years have stood on guard at the busiest intersections in Bassano, have been removed. It was considered that they were of little value as traffic regulators.

The high and public schools of Innisfail, Bowden, Olds, Didsbury, Castor and Crossfield have arranged their annual Field Day at Didsbury for Friday, October 4th.

Debentures of the town of Drumheller to the value of \$34,000 were recently sold to the Canadian Bank of Commerce at a price of 95%.

The Three Hills School Fair was a real success this year.

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
